Product Description

Product Description

PEEK series material is based on polyether ether ketone resin.Semi-crystalline advanced materials have unique comprehensive properties, such as high mechanical properties, high temperature resistance and excellent chemical resistance, which make them the most popular advanced plastic materials.

Main performance:

At high temperature, it still has high mechanical strength, stiffness and creep resistance.
In the air, the maximum operating temperature is very high (250 continuous operation, 310 for a short time).
Excellent chemical resistance and hydrolysis resistance
Excellent wear resistance
Good dimensional stability
Excellent resistance to high-energy radiation (gamma- and X- rays)
Inherent low flammability and very low smoke diffusion during combustion
