

Molybdenum Disulfide Filled Nylon 6 MoS2 30mm Engineering Material

MoS2,

Basic Information

- Place of Origin:
- Brand Name: MAKEWELL
- Certification: ISO9001 Rohs, Reach

China

- Model Number: Nylon PA6 MoS2 rod
- Minimum Order 10kg
 Quantity:
- Price: Negociation
- Packaging Details: Pallet
- Delivery Time: 7-15 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
 Supply Ability: 10000000 kg /month

Makewell Molybdenum Disulfide Nylon 6 Makewell 30mm Nylon 6 MoS2, Makewell Engineering 30mm nylon rod

Product Description:

Nylon 6 MoS2: High Surface Hardness and High Flexural Modulus

Nylon 6 MoS2 is a special type of nylon round rod filled with molybdenum disulfide (MoS2). It is a high-performance engineering material that offers superior mechanical properties, including high surface hardness and high flexural modulus. It is available in a variety of sizes from 25mm to 100mm in diameter.

Nylon 6 MoS2 provides excellent wear and abrasion resistance and is perfect for applications that require high strength-to-weight ratio. It is ideal for applications where a high load-bearing capacity is required. It is also suitable for extruding and moulding processes. The unique combination of high surface hardness and high flexural modulus makes Nylon 6 MoS2 an ideal solution for OEM/ODM applications. It is a robust material that can withstand extreme temperatures and environmental conditions and is highly resistant to corrosion. Nylon 6 MoS2 is an excellent choice for a variety of industrial and commercial applications.

Features:

Product Name: Nylon 6 MoS2 Impact Strength: High Flexural Modulus: High Abrasion Resistance: High Color: Black Surface Hardness: High 6mm Nylon Rod: Available

Technical Parameters:

Product Property	Description
Material	Molybdenum Disulfide (MoS2) Filled Nylon (Nylon 66)
Service	OEM/ODM
Size	25-100mm Diameter
Plastic Modeling Type	Extruding, Mould
Additive	MoS2
Color	Black
Chemical Resistance	High
Abrasion Resistance	High
Surface Hardness	High
Flexural Modulus	High
Impact Strength	High

Applications:

MAKEWELL's Nylon PA6 MoS2 rod is a high-performance, long-lasting plastic rod made from the highest quality nylon 66 material for superior chemical and abrasion resistance. Its high impact strength makes it an ideal choice for heavy-duty applications in the automotive, industrial, and marine industries. The MoS2 coating provides enhanced lubricity for improved wear and corrosion resistance. With an ISO9001 Rohs, Reach certification, this rod is guaranteed to meet rigorous quality standards. It is available in black and can be custom-ordered in a variety of sizes and configurations. The minimum order quantity is 10 kg and the price is negotiable. The delivery time is 7-15 days depending on the quantity and the packaging details are pallet. Payment terms include L/C, D/A, D/P, T/T, Western Union, and MoneyGram. The monthly supply capacity is 100,000,000 kg.

The nylon PA6 MoS2 rod is highly resistant to chemicals, solvents, and other corrosive agents, making it an excellent choice for applications that require long-term durability and reliability. It is also highly resistant to abrasion, making it the ideal choice for parts that may experience high wear and tear. It is commonly used as an extrusion or molding material for industrial components, automotive parts, and marine equipment. The rod is perfect for any application that requires a high level of strength and corrosion resistance, and its superior lubricity makes it an ideal choice for high-performance applications.

Customization:

Nylon 6 MoS2

Brand Name: MAKEWELL Model Number: Nylon PA6 MoS2 rod Place of Origin: China
