Product Description

Product Description

PTFE Fluorosint PTFE enhanced forms derive their unique properties from a special process. Synthetic mica are chemically linked to pure PTFE molecules to produce properties that are not normally achieved by PTFE enhanced forms. The Fluorosint series offers excellent friction reduction and size stability.

Main performance:

Medium mechanical strength and rigidity

High operating temperature in the air (260°C continuous operation)

Good dimensional stability

Small load variation (Fluorosint MT-01)

Low friction coefficient and good wear resistance

Outstanding UV and weather resistance

Physiological inertia (Fluorosint207 and HPV contain food exposure regulatory conformance ingredients)

Inherent low flammability
